

New courses available through the
IHN/PDN Distance Learning Series
www.IHNUniversity.com

WAHSA is pleased to announce that 19 new courses have been made available on the IHNUniversity.com website. These particular courses are ideal for professionals and staff with dietary and nursing backgrounds, (RDs, RDTs, RNs, LPNs and LVNs) but are useful in many other areas of expertise as well.

In collaboration with the American Association of Homes and Services for the Aging (AAHSA), Maun-Lemke, LLC (IHNUniversity.com), Digi Systems, and many quality health care speakers, we've developed the IHN/PDN Distance Learning Series to provide members high quality, affordable health care courses and training via the internet. All internet sessions offered through IHNUniversity.com will be archived and available throughout the year.

If you are unable to attend a conference, or if you've miscounted your credits, this program will allow you to complete the necessary course to complete the requirements. Don't forget that even if you don't have a license in the specific area noted, you can still take a course on a non-CEU basis for self-improvement at any time! Be sure to visit the website (www.ihnuniversity.com) often to check out new/updated courses.

Registration is currently open for the first course we announced, featuring Clint Maun, *Dealing with Difficult People*, and the class is available at your convenience anytime prior to December 31, 2009. One (1) CEU credit for nursing home administrators will be issued per \$39 fee. For sign-up information, go to www.IHNUniversity.com

For detailed course description(s), CEU information, course fee(s), or to register, please go to: www.IHNUniversity.com or if you have any questions, please e-mail: info@wahsa.org or call 608.255.7060.

Nineteen new courses have been added to the list of available educational offerings. Although WAHSA is not applying for administrator CEUs for the new courses, these are quality offerings that will enhance your organization's ability to provide quality care and services. These courses are specifically designed for dietary and nursing backgrounds. Check the following list to see if one or more of these new courses can fulfill your organization's educational needs:

- Dehydration: Elderly at Risk in Nursing Facilities
- Management of Urinary Incontinence in the Elderly
- Management of Acute Cystitis in the Female Patient
- Dysphagia: Management and Treatment from a Dietitian's Perspective
- Nutritional Assessment: Utilizing Lab Values to Determine Nutritional Status
- OSHA's Bloodborne Pathogens Standard: What is it and How to Reduce Occupational Exposure
- Resident Abuse in Nursing Facilities: What is it? How to Investigate and Prevent It
- Fall Prevention: Decreasing the Risk for Residents in Nursing Facilities
- Prevention and Care of Pressure Ulcers
- Part I: Medication Delivery System: Receiving and Transcribing Orders Correctly
- Part V: Medication Delivery System: Adverse Drug Reaction
- Part VI: Medication Delivery System: Drug Diversion
- Nutritional Care for Patients with Alzheimer's Disease and Other Dementia
- Quality Indicators and Medications
- Alzheimer's Disease or Related Disorders (ADRD): Introduction
- Alzheimer's Disease or Related Disorders (ADRD): Part 1
- Alzheimer's Disease or Related Disorders (ADRD): Part 2
- Alzheimer's Disease or Related Disorders (ADRD): Part 3
- Medicare: Nursing Responsibilities in Skilled Nursing Facilities
